

31 August 2010

**DANISH SHIP FINANCE A/S
(DANMARKS SKIBSKREDIT A/S)**

**INTERIM REPORT
FIRST HALF-YEAR 2010**

The Board of Directors of Danish Ship Finance A/S has today considered the interim report for the first half of 2010.

Danish Ship Finance presents its financial statements in accordance with the rules set out in the Danish FSA's executive order on financial reports by credit institutions, etc. The accounting policies are unchanged from those applied in the interim report for the first half of 2009 and the annual report for 2009.

As in previous years, the interim report is unaudited and not reviewed.

Highlights of the first half-year:

- The profit for the period amounted to DKK 187 million compared with a profit of DKK 93 million in the first half of 2009.
- Net interest income from lending operations rose by DKK 115 million as a result of rising interest income from new and existing loans and lower funding costs. This increase, however, should be seen against the background of extraordinarily low interest income in the first half of 2009.
- Loan impairment charges amounted to DKK 276 million, which is almost DKK 100 million less than in the year-earlier period. The accumulated impairment ratio totalled 3.7% as compared with 2.8% at the same time last year. The accumulated impairment ratio was unchanged relative to 31 December 2009. There has been no increase in impairment charges since the beginning of the year measured in lending currency (primarily US dollars). During the period, Danish Ship Finance recorded a loss on loans of DKK 0.2 million.
- The return on asset management activities remains positively affected by the declining rates of interest. However, positive value adjustments were nearly DKK 100 million lower than in the year-earlier period.
- The solvency ratio was 13.6% at the end of the first half of 2010, against 14.3% at 31 December 2010. Accordingly, the solvency ratio is well above the minimum requirement of 8%.

Key figures for Danish Ship Finance A/S			
DKK million	1st half 2010	1st half 2009	Full year 2009
Net interest income from lending operations	172	57	234
Net interest income from financing operations	264	248	489
Total net interest income	436	305	723
Net interest and fee income	475	344	772
Market value adjustments	98	196	508
Staff costs and administrative expenses	(45)	(43)	(82)
Loan impairment charges, etc.	(276)	(374)	(874)
Profit/loss before tax	252	122	323
Profit/loss for the period	187	93	263
Loans	55,487	46,917	48,438
Bonds	30,762	30,125	30,616
Subordinated debt	898	-	897
Equity	9,191	8,873	9,043
Total assets	90,235	85,446	84,947

Ratios	1st half 2010	1st half 2009	Full year 2009
Solvency ratio	13.6	12.9	14.3
Tier 1 capital ratio	13.6	12.9	14.3
Return on equity before tax (%)	2.8	1.4	3.6
Return on equity after tax in (%)	2.1	1.0	2.9
Income/cost ratio (DKK) *)	1.8	1.3	1.3
Income/cost ratio (ex. impairment charges)	12.6	12.2	15.3
Foreign exchange position (%)	13.8	11.6	13.3
Gearing of loans and advances	6.0	5.3	5.4
Growth in lending for the period (%)	14.6	(2.5)	0.7
Impairment ratio for the period	0.5	0.8	1.7
Accumulated impairment ratio	3.7	2.8	3.7

Key ratios are calculated in accordance with Appendix 6 of the Danish FSA's instructions for financial reporting in credit institutions, etc.

*) In accordance with the instructions, the income/cost ratio must be calculated including loan impairment charges. In the overview, this would lead to negative figures if a period's net figure includes reversed impairment charges that exceed staff costs and administrative expenses.

Consequently, the list of key ratios also includes an income/cost ratio in which impairment charges are not included.

Management's review

Income statement

The profit for the period after tax amounted to DKK 186.9 million compared with a profit of DKK 92.7 million in the first half of 2009.

Net earnings from lending operations including fees were higher than last year, with total earnings amounting to DKK 205.1 million for the period, up from DKK 85.2 million in the first half of 2009. Credit margins on loans have risen compared with the year-earlier period, and developments in the exchange rate of the USD against DKK resulted in decent growth in total lending and a resulting increase in earnings. Furthermore, funding costs were lower than in the same period of last year because the turmoil on the financial markets has abated.

Interest and dividend earnings from financing operations rose to DKK 270.3 million from DKK 258.6 million in the first half of 2009.

Net interest and fee income rose to DKK 475.4 million from DKK 343.8 million in the first half of 2009.

Market value adjustments of securities and foreign exchange amounted to an income of DKK 98.3 million compared with an income of DKK 196.3 million in the same period of last year. The securities portfolio consists primarily of Danish government bonds and mortgage bonds or bonds with similar security, while a small proportion has been invested in shares (unit trust certificates).

The market value adjustment for the period was due primarily to consistently falling interest rates for the portfolio of bonds and other fixed-income instruments. The option-adjusted duration of the portfolio of bonds and fixed-income instruments was reduced from 2.4 at the beginning of 2010 to 1.2 at 30 June 2010.

Staff costs and administrative expenses were up from DKK 43.3 million in the first half of 2009 to DKK 44.6 million in the same period of this year. The average number of employees was 58 during the first half of 2010, against 59 employees in the year-earlier period.

Loan impairment charges for the first half of 2010 amounted to a net expense of DKK 276.0 million compared with an expense of DKK 374.3 million in the same period of last year. Accumulated impairment charges increased from DKK 1,871.7 million at year-end 2009 to DKK 2,157.0 million at 30 June 2010. Total impairment charges made up 3.7 % of total lending and guarantees as compared with 2.8 % at 30 June 2009 and 3.7% at 31 December 2009. During the first half of 2010, Danish Ship Finance recorded a loss on loans of merely DKK 0.2 million.

The mortgaged vessels are valued at least every six months by an approved, independent broker with knowledge about the vessel type in question. Danish Ship Finance occasionally make these valuations based on recent ship transactions or sister ships. Subsequently, any impairment is calculated on the basis of the financial standing of the shipowner and the estimated value of the mortgaged vessels in a forced sale.

Tax on the profit for the period represents an expense of DKK 65.4 million against an expense of DKK 28.9 million in the first half of 2009.

Balance sheet and capital structure

Total assets increased to DKK 90,235.0 million from DKK 85,445.9 million at 30 June 2009.

Total lending increased by DKK 8,569.6 million, from DKK 46,917.1 million at 30 June 2009 to DKK 55,486.7 million at 30 June 2010. Relative to 31 December 2009, lending rose by 14.5% to DKK 7,049.1 million. As most of the loans are denominated in US dollars, the increase is attributable to the fact the exchange rate of the USD against DKK has risen by 17% since 1 January. The exchange rate adjustment amounts to DKK 7,607.0 million.

During the first half of 2010, there was an increase in new loans of DKK 3,508.5 million, whilst existing customers repaid loans in the amount of DKK 3,757.8 million. Note 11 provides a detailed description of loan developments.

Issued bonds declined from DKK 65,552.5 million at 30 June 2009 to DKK 65,339.5 million at 30 June 2010. As part of its efforts to retain strong liquidity resources, Danish Ship Finance regularly issues bonds in advance of the expected cash outflow resulting from the disbursement of new loans. This policy makes the company financially strong to short-term fluctuations in the capital market.

The bond portfolio rose to DKK 30,762.0 million from DKK 30,125.1 million at 30 June 2009. Part of the bond portfolio can be attributed to proceeds from issued bonds, which have not yet been disbursed as already granted or expected loans.

After giving effect to the retained profit for the period after tax, the company's equity amounted to DKK 9,190.5 million as compared with DKK 8,873.0 million at 30 June 2009. In April 2010, an amount of DKK 39.4 million was distributed as dividend to the B shareholder in accordance with the profit allocation adopted at the annual general meeting in 2009.

Danish Ship Finance is subject to the capital adequacy rules of section 143 of the Danish Financial Business Act. The solvency ratio has been calculated at 13.6% as at 30 June 2010 as compared with 12.9% as at 30 June 2009. The higher solvency ratio is explained especially by the hybrid Tier 1 capital raised under the Second Bank Package and consolidation of the profit for 2009, whereas the increase in the loan portfolio has the opposite effect on the solvency ratio. Note 26 provides a specification of the company's solvency.

The adequate capital base amounted to DKK 4.2 billion at 30 June 2010, corresponding to a calculated individual solvency need of 6.1%. The individual solvency need has been fixed at 8%, which is equal to the minimum statutory requirement.

No events have occurred after the balance sheet date that have a material effect on the company's accounts.

Impact of US dollar on income statement, balance sheet and capital structure

The exchange rate of the USD against DKK rose from 519.01 at 1 January 2010 to 607.02 at 30 June, equal to an appreciation of 17.0%. The average USD/DKK exchange rate for the six-month period was approximately 561.

Other things being equal, developments in the exchange rate of the US dollar in the first half of 2010 had a positive impact on net interest and fee income of DKK 30.4 million and an adverse impact on impairment charges in the amount of DKK 339.9 million. Profit after tax and equity were reduced by DKK 232.1 thousand from the change. The changing US dollar rate increased total assets by DKK 7.6 billion and reduced the solvency by 1.7% because of an increase in weighted items for lending.

Outlook for the second half of 2010

At the beginning of the second half-year, much uncertainty remained about the prospects for economic developments in various regions around the world, and experience suggests that this leads to great uncertainty about developments in demand for sea transports.

On the supply side, postponed and cancelled orders for the past 18 months have resulted in weaker growth in the volume of new tonnage than expected at the onset of the crisis. At the beginning of the year, most large segments still had well-filled order books. Therefore, the fact that there is renewed contracting appetite, especially in the dry cargo segment, in the first half of 2010 gives rise to continuing concern.

Consequently, the crisis in the shipping industry cannot be called off just yet, even though a number of segments have experienced improved rate levels.

Danish Ship Finance will therefore continue its highly selective lending operations in order to retain the sound credit quality and, by extension, a high level of security towards the bond owners.

In spite of the prudent lending policy, the necessity of additional impairment charges in the second half of 2010 obviously cannot be ruled out. Furthermore, losses are expected to be incurred in the second half on individual exposures on which the amount has been written off.

The company's earnings and solvency ratio are affected by developments in the USD/DKK exchange rate because the bulk of the loans are denominated in USD. The appreciating USD has a direct positive impact on earnings on lending operations but an adverse effect on impairment charges and the solvency ratio. Measured in terms of earnings currency, the company forecasts a small increase in earnings in the second half of 2010, and at the present USD/DKK exchange rate earnings measured in Danish kroner are expected to be higher than in the first half of 2010.

In addition, the financial performance in the second half will be affected by market value adjustments of bonds and shares (unit trust certificates).

Danish Ship Finance has resolved to continue recent years' policy of not issuing quarterly reports in 2010. The company currently publishes full-year and half-year reports. It is believed that more frequent reports would not affect the pricing of the bonds issued.

Statement by the Management Board and the Board of Directors

The Board of Directors and the Management Board have today considered and adopted the interim report for the first half of 2010 of Danish Ship Finance A/S (Danmarks Skibskredit A/S). The interim report has been prepared in accordance with Executive Order no. 1202 dated 11 December 2008 on a Ship Finance Institute and the Danish Financial Business Act, including the Danish FSA's executive order on financial reports by credit institutions and investment companies, etc. (“executive order on financial reporting”).

We consider the applied accounting policies appropriate for the interim financial statements to provide a true and fair view of the company’s financial position at 30 June 2010 as well as of its activities for the first half of 2010.

We consider the management’s review to give a fair review of developments in the activities and financial position of the company and to describe significant risk and uncertainty factors that may affect the company.

SUBORDINATED DEBT	as at 30 June 2010	as at 30 June 2009	as at 31 December 2009
Principal	900.0	-	900.0
Origination fees for amortisation	(2.2)	-	(2.7)
Subordinated debt	<u>897.8</u>	<u>0.0</u>	<u>897.3</u>

Subordinated debt consists of liabilities in the form of hybrid tier 1 capital which, in the event of the company's voluntary or compulsory winding up, will not be repaid until after the claims of ordinary creditors have been met. Hybrid tier 1 capital is subordinated loan capital.

Prepayment of subordinated debt must be approved by the Danish FSA.

Subordinated debt is included in the capital base pursuant to the Danish Financial Business Act.

The hybrid tier 1 capital was received under the Second Bank Package.

NOTE 25.	<i>DKK million</i>		
EQUITY	as at 30 June 2010	as at 30 June 2009	as at 31 December 2009

In the ordinary course of its lending operations, Danish Ship Finance has undertaken commitments relating to irrevocable credit commitments on other loans in the amount of	<u>4,125.3</u>	<u>8,660.9</u>	<u>6,867.5</u>
Total other binding agreements	<u>5,928.1</u>	<u>10,836.7</u>	<u>8,767.7</u>

NOTE 29.**RELATED PARTIES**

Related parties comprise members of the company's Management Board and Board of Directors. Related parties also comprise shareholders who hold more than 20% of the shares or more than 20% of the voting rights in the company.

Transactions with the Management Board and Board of Directors only concern remuneration. See notes 6 and 7.

Other related-party transactions involving deposits and debt and transactions with financial instruments in the form of swaps agreements, forward currency agreements, forward rate agreements and forward securities transactions, etc. are made on an arm's length basis. In special cases, however, the terms and conditions are made in accordance with shipyard subsidy schemes or international rules on government participation in the financing of newbuildings.

The company has no related parties with a controlling influence.

NOTE 30.*DKK million***HEDGE ACCOUNTING AT 30 JUNE 2010**

The company regularly hedges the interest rate risk on fixed-rate assets and liabilities. The effectiveness of such hedges is measured on a regular basis.

	Nominal value	Carrying amount	Fair value
Commitments			
Issued bonds	35,580.3	34,759.4	35,141.4
Total commitments	35,580.3	34,759.4	35,141.4

NOTE 33.

**EXCHANGE RATE RISK AND USE OF DERIVATIVES
AT 30 JUNE 2010**

The total unhedged foreign currency position at 30 June 2009, translated at year-end exchange rates into DKK amounts to DKK 981.6 million (DKK 587.7 million at 30 June 2009).

All amounts are translated into DKK at the year-end exchange rates.

The net position is specified as follows:

Amounts in DKK million

	USD	Other currencies	Total foreign currency	DKK	Total
Loans at year-end exchange rates	51,623.3	4,765.4	56,388.7	1,240.0	57,628.7
Impairment charges				-2,142.0	-2,142.0
Loans as per the balance sheet					55,486.7
Due from credit institutions and central banks	174.7	32.5	207.2	5.7	212.9
Bond portfolios		709.7	709.7	30,052.3	30,762.0
Interest receivable, etc.	304.4	98.2	402.6	368.4	771.0
Other assets		2.4	2.4	3,000.0	3,002.4
Total assets as per the balance sheet	52,102.4	5,608.2	57,710.6	32,524.4	90,235.0
Issued bonds at year-end exchange rates	-11,329.1	-856.6	-12,185.7	-53,153.8	-65,339.5
Issued bonds as per the balance sheet					-65,339.5
Due to banks	0.0	0.0	0.0	-9,046.8	-9,046.8
Interest payable	-192.2	-69.8	-262.0	-438.3	-700.3

Derivative financial instruments - payables	-40,657.8	-10,615.1	-51,272.9		
Total net position (translated into DKK)	146.9	834.7	981.6		

NOTE 34.

	as at 30 June 2010	as at 30 June 2009	<i>DKK million</i> as at 31 December 2009
MARKET RISK SENSITIVITY			

The company is exposed to several types of market risk. To illustrate the impact or sensitivity relative to each type of risk, the table below describes the amounts by which the company's results and equity are expected to change in various, fairly likely scenarios. Also indicated is the solvency impact due to a change in the exchange rate of the USD vis-à-vis DKK.

Interest rate risk

An interest rate increase of 1 percentage point

Change in results	(172.7)	(261.1)	(181.5)
Change in equity	(172.7)	(261.1)	(181.5)

An interest rate fall of 1 percentage point

Change in results	172.7	261.1	181.5
Change in equity	172.7	261.1	181.5

Equity risk

An increase in the value of the shares of 10 percentage points

Change in results	50.9	45.0	52.0
Change in equity	50.9	45.0	52.0

A decline in the value of the shares of 10 percentage points

Change in results	(50.9)	(45.0)	(52.0)
Change in equity	(50.9)	(45.0)	(52.0)

Exchange rate risk

An appreciation of the USD exchange rate vis-à-vis DKK

Change in results	(206.4)	(154.5)	(223.2)
Change in equity	(206.4)	(154.5)	(223.2)
Percentage change in solvency	(1,6%)	(1,6%)	(1,8%)

A depreciation of the USD exchange rate vis-à-vis DKK

Change in results	206.4	154.5	223.2
Change in equity	206.4	154.5	223.2
Percentage change in solvency	1,6%	1,6%	1,8%

The impact on the profit and equity from a change in the exchange rate of USD vis-à-vis DKK assumes a permanent change of DKK 1 during an entire financial year. The impact comprises the change in the value of ongoing net interest and fee income as well as the change in the need for impairment charges due to the change in the exchange rate of USD.

If the exchange rate sensitivity is calculated ex. impairment charges, the profit and equity at 30 June 2010 is changed by DKK 60.2 million (at 31 December 2009: DKK 47.3 million).

The impact on solvency from a change in the exchange rate of USD takes effect immediately on a change in the exchange rate because the predominant part of loans, guarantees and loan offers submitted are made in that currency.

NOTE 35.*DKK million*

FAIR VALUE OF FINANCIAL INSTRUMENTS MEASURED AT AMORTISED COST	as at 30 June 2010	as at 30 June 2009	as at 31 December 2009
---	-------------------------------	-------------------------------	-----------------------------------

Financial instruments are measured in the balance sheet at fair value or amortised cost.

The difference between carrying amounts and fair-value based values, which are not recognised in the income statement and which are attributable to the difference between the amortised cost and the calculated fair value is shown below.

Loans

Measured at amortised cost	55,486.7	46,917.1	48,437.6
Measured at fair value	56,550.2	47,523.4	48,996.5

For loans, the fair value is calculated as an approximation based on amortised cost for unmatched loans with the addition of the fair value of fixed-rate matched loans

Issued bonds

Measured at amortised cost, incl. hedging	65,339.5	65,552.5	63,056.9
Measured at fair value	66,073.3	64,333.4	63,326.0

For issued bonds, the fair value is calculated on the basis of quoted market prices. For unlisted bonds, the fair value is calculated on the basis of observable market data.

NOTE 36.

CREDIT RISK	<i>DKK million</i>		
	as at 30 June 2010	as at 30 June 2009	as at 31 December 2009
Total credit exposure distributed on balance sheet and off-balance sheet items			
Due from credit institutions and central banks	212.9	1,548.5	759.4
Loans at amortised cost	55,486.7	46,917.1	48,437.6
Bonds at fair value	30,762.0	30,125.1	30,616.1
Shares etc.	509.0	450.0	519.7
Derivatives	1,780.6	3,823.9	3,402.7
Total balance sheet items	<u>88,751.2</u>	<u>82,864.6</u>	<u>83,735.5</u>
Off-balance sheet items			
Contingent liabilities	595.5	479.1	467.1
Other binding agreements	5,928.1	10,836.7	8,767.7
Total off-balance sheet items	<u>6,523.6</u>	<u>11,315.8</u>	<u>9,234.8</u>

Credit risk in the loan portfolio**Maximum credit risk without regard to collateral**

All loans have been reviewed to identify any evidence of impairment. The company believes that the carrying amount of loans subsequently stated best represents the maximum credit risk.

Description of collateral

The loans are generally secured through first priority ship's mortgages.

Percentage distribution of loans including guarantees after impairment calculated in the LTV ranges, measured in terms of nominal residual debt.

Loan-to-value range	Share of loans 30 June 2010	Share of loans 30 June 2009	Share of loans 31 December 2009
0 - 20 %	32%	28%	29%
20 - 40 %	31%	26%	27%
40 - 60 %	27%	23%	23%
60 - 80 %	8%	14%	16%
80 - 100 %	1%	5%	2%
Over 100 %	1%	3%	3%

Loans for shipbuilding financing is included in the "over 100%" category in the table above. No mortgage is registered on vessels during the building period, but the company receives a guarantee from the borrower, and is secured through assignment and subrogation in the building contract and subrogation in the refundment guarantee provided by the shipyard's bank. Loans for shipbuilding accounted for 1.0 pct. of the loan portfolio at 30 June 2010 (2.4 pct. at 31 December 2009).

It appears from the table above that 90 pct. of the loan amounts is secured through mortgages within 60 pct. of the most recently calculated market value of the mortgage, and 98 pct. of the loans are within 80 pct. of the most recently calculated market value of the mortgage.

The market value of ships has generally increased by about 28 pct. since December 2009 in DKK and about 14 pct. in US dollars.

Credit quality on loans neither subject to default or impairment

The shipping markets are currently affected by the general economic slowdown combined with a general excess supply of ships. All loans have been reviewed to identify any evidence of impairment, and the company has made the impairment charges it considered necessary.

The credit quality of loans that are subsequently not subject to impairment or arrears, is considered strong.

Arrears

There are no loans in arrears on which the company has not made impairment charges.

NOTE 37.**REFERENCE NOTE**

The list of key figures and ratios is set out in the management's review, to which reference is made.

Danish Ship Finance presents its financial statements in accordance with the rules set out in the Danish FSA's executive order on financial reports by credit institutions, etc. (Executive Order on Financial Reporting). The accounting policies are unchanged from the policies applied in the annual report for 2009. The accounting policies are described in note 2 to the annual report for 2009, to which reference is made.

The description of financial risks and policies for financial risk management is set out in the risk management section of the annual report for 2009, to which reference is made.
